

Hello Michel

Since we installed the 8 sensor system in my home we have had no further false alarms.

I am happy to let you know that last month we avoided a flood when your system was triggered by a toilet tank valve failure on our attic floor of this 4 floor house. The system behaved exactly as it should.

Best wishes

Hello Michael,

Here is the information the discount and an info sheet on Comprehensive Water Coverage.

Automatic Water Shut Off Discount:

⊕Criteria:

Automatic water shut-off system must be installed according to the manufacturer's specifications and be fully operational. Water leak sensors must be located in all areas of the plumbing system that are vulnerable to water leaks, including the hot water tank, dishwasher, washing machine, refrigerator ice makers, and under all toilet tanks and sinks. Each water leak sensor must be connected to the water shut-off valve by hard wire and/or wireless configuration (powered by long-life lithium batteries that are changed every two years).

□

I have calculated a premium for 137,500 in limit for the Comprehensive Waster Coverage with a 2% deductible, your premium would be approx., 1258\$ for one year.

I await your call should you wish to make changes to your policy or if you have any questions .
